Dear Hiring Team,

I am writing to express my interest in joining your team as a Full-Stack Developer. As a passionate full-stack developer with hands-on experience building production web applications with React, Angular, Vue.js, and Laravel, I am confident that my skills and drive align well with the work your team does.

Over the past year, I have worked as a freelance full-stack developer, delivering end-to-end web solutions for clients - from responsive frontends built with modern JavaScript frameworks to robust REST APIs and backend systems. I enjoy turning complex problems into clean, efficient, and maintainable code, and I take pride in managing projects from concept through deployment while keeping clients informed and satisfied.

Highlights of my work include a full-stack fintech application for smart card management (React + Laravel), a mobile-first local trading platform with real-time chat and payment processing (React 19), an e-commerce platform built with Angular and Express featuring server-side rendering, and a feature-rich notes management application (Angular).

My background includes a B.Sc. in Computer Science & Engineering from Ladoke Akintola University of Technology, and I am currently completing a Software Engineering Diploma (Full-Stack Development) at SQI College of ICT (SQI coding school) for 2025 - 2026, where I continue to sharpen my skills across the modern web stack.

I would welcome the opportunity to discuss how I can contribute to your team. Thank you for your time and consideration.

Yours faithfully,

Alex Olajide Momodu
